

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

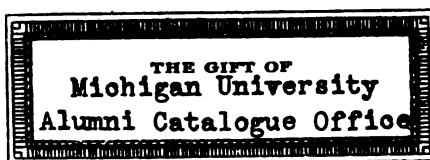

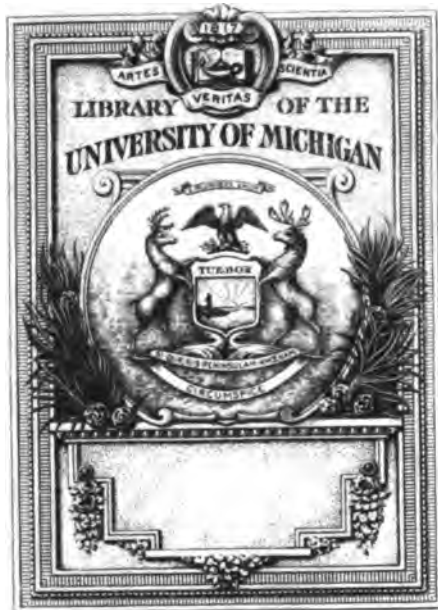

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. INTRODUCTION

Six years have elapsed since the last edition of the Directory and though the present is not a particularly good time to bring out a new edition, on account of the many changes of address and of occupation resulting from the War, the Directors of the Harvard Alumni Association last spring decided that a new edition was desired by Harvard men generally and would be useful to the University in many ways, especially in aiding the Committee of the Harvard Alumni Association in charge of the Harvard Endowment Fund. They therefore offered to assume the financial responsibility of a new edition and this offer was accepted by the University.

The Directors of the Harvard Alumni Association believe that frequent editions of the Directory are desirable, perhaps in more forms than one: and they are prepared, provided the demand exists, to arrange for the publication of more frequent editions in the future.

THE HARVARD ALUMNI ASSOCIATION.

By CHARLES JACKSON,
General Secretary.

AUGUST 15, 1919.

PREFACE

This edition of the Directory contains a list of former students of Harvard University now living: including both graduates and non-graduates. The names of undergraduates are not included. In this connection, it may be well to call attention to the fact that to avoid confusion and to indicate clearly that this office deals only with the records of men who have completed their studies at the University, the name of the office has been changed by the University authorities from the Harvard University Directory to the Harvard Alumni Directory.

The names of 38,122 men are recorded in this edition; this number includes those of 1,571 lost men. The data recorded of each man consists of his name, his years of enrollment in the University, the degrees obtained by him at Harvard, and his address and occupation where known.

The data is that on the records of this office August fifteenth when the edition went to press. No changes have been made while in press.

As stated in the prospectus, the geographical list is not included in this edition. The decision not to include it was based upon the desire to keep the cost of the edition as low as possible; and also to reduce the time in press by one-half. It is desirable that a publication of as ephemeral value as a directory should be in press as short a time as possible. Harvard Clubs and individuals desiring lists of Harvard men living in certain localities can have such lists sent them promptly by the Directory office upon application. A reasonable charge will be made for such service.

Though every effort has been made to reduce errors and omissions, the editor realizes that this publication doubtless contains many. He will be grateful for any corrections that may be sent to him.

A word about occupations may not be out of place. It is difficult to obtain a general agreement as to how occupations should be classified. In this edition, an attempt has been made to classify along rather broad, general lines so that the inquirer may know whether the man he is looking up is in a profession and if so, what profession; and if engaged in business, in what kind of business he is engaged. In the case of engineers and chemists, however, the practice of some technical schools has been followed and the fact that the man is a chemist or an engineer is given rather than the character of the business with which he may be connected.

The data of this edition was obtained from many sources and proof sheets were mailed last May to all the men with the request that they

make any desired corrections. The editor desires to record his grateful appreciation of the cordial co-operation of thousands and thousands of Harvard men in returning these proof sheets either with an O.K. or a correction. He also desires to express his gratitude to the officers of the University, to the class secretaries, to the Harvard Alumni Association, to the Harvard Alumni Bulletin, to the secretaries of the alumni associations of the graduate schools, and to many Harvard Clubs, especially to the Harvard Club of Boston and the Harvard Club of New York both of which send to this office every death or change of address recorded by them.

The editor's acknowledgment would not be complete if he did not testify to the loyalty and generous co-operation of the clerical force of the office. Every one of the clerks deserves credits. Especial mention should be made of Miss Roberts the head clerk, Miss Harlow, Miss Pennington, and Miss Robinson; to their sympathetic and efficient loyalty the product of the office is largely due.

FREDERICK S. MEAD,
Editor.

ABBREVIATIONS

DEGREES

A list of the degrees conferred by Harvard University and their abbreviations is given on the preceding page.

The date of each degree is the last year of the recorded enrollment unless a different year is stated. Thus, the entry John Doe, [c 92-96, A.B.] indicates that the degree of A.B. was conferred in 1896. A degree conferred in another year is followed by the date. Thus, John Doe, [g 92-95, A.M. 96]. In the case of out-of-course degrees the date of the degree is followed by the date, in parentheses, when it was actually conferred. Thus, John Doe, [c 92-95, A.B. 96 (95)] means that John Doe received his degree of A.B. in 1895 as of 1896.

DEPARTMENTS OF THE UNIVERSITY

The following abbreviations have been used to indicate the department of the University in which the student has been enrolled.
